

92133053 – ORIBHUNUEBHO, HAPPINESS

OOFPP

DEVELOPMENT PHASE

PROJECT OVERVIEW

The created application is a CLI based backend that handles multiple features for habit tracking:

- Create habits
- Read/list habits
- Update habits
- Delete habits
- Analyze habit streaks

All features are implemented using Object-oriented and functional programming in Python v3.13 with a database as data storage mechanism.

```
uv run src\main.py

=====
🚀 HABIT TRACKER - Build Better Habits 🚀
=====
Type 'help' to see available commands

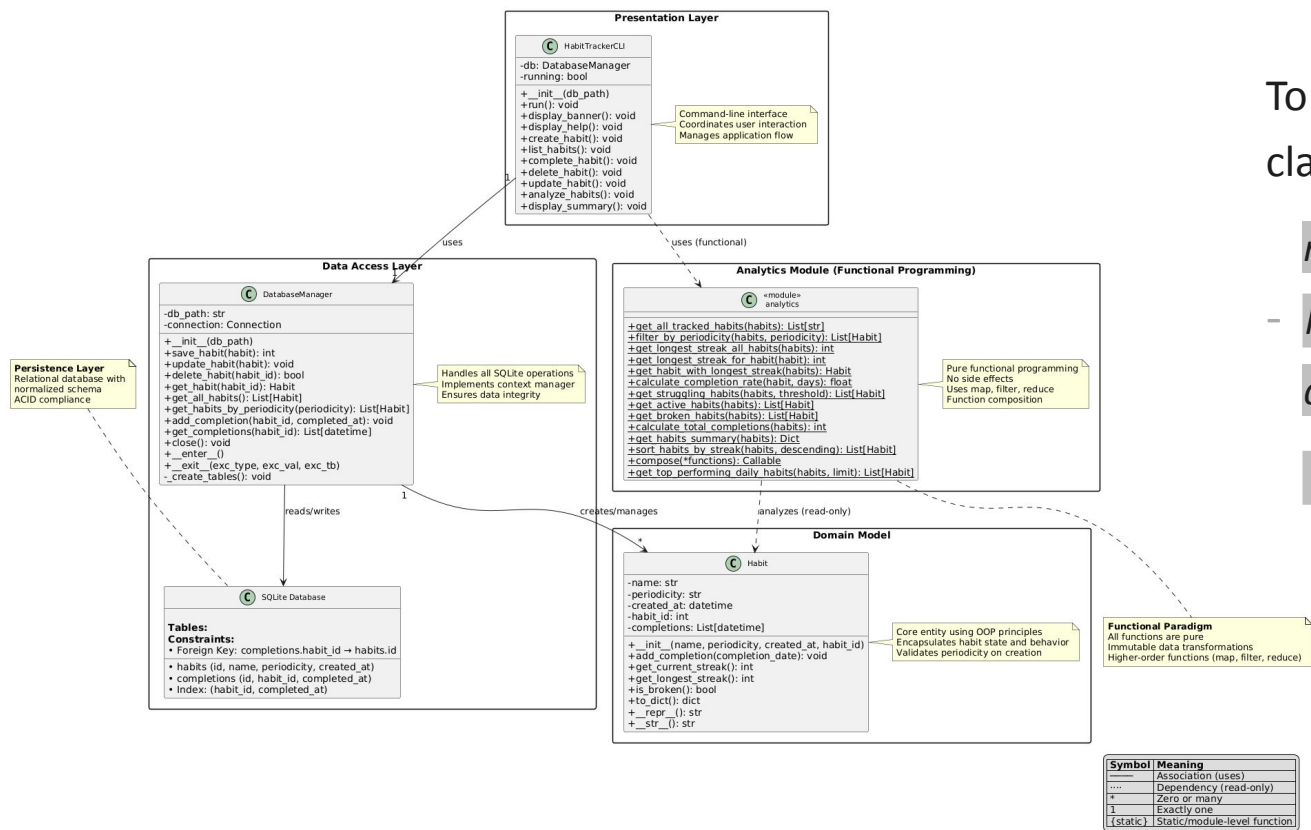

> help

| AVAILABLE COMMANDS |                              |
|--------------------|------------------------------|
| create             | - Create a new habit         |
| list               | - List all habits            |
| complete           | - Mark a habit as completed  |
| delete             | - Delete a habit             |
| update             | - Update habit details       |
| analyze            | - View habit analytics       |
| summary            | - Display overall statistics |
| help               | - Show this help menu        |
| exit               | - Exit the application       |

> 
```

To follow the object-oriented principle, I implemented multiple classes which are represented by the following files:

`main.py` – used for CLI interaction

– `habit.py` – defines the Habit class

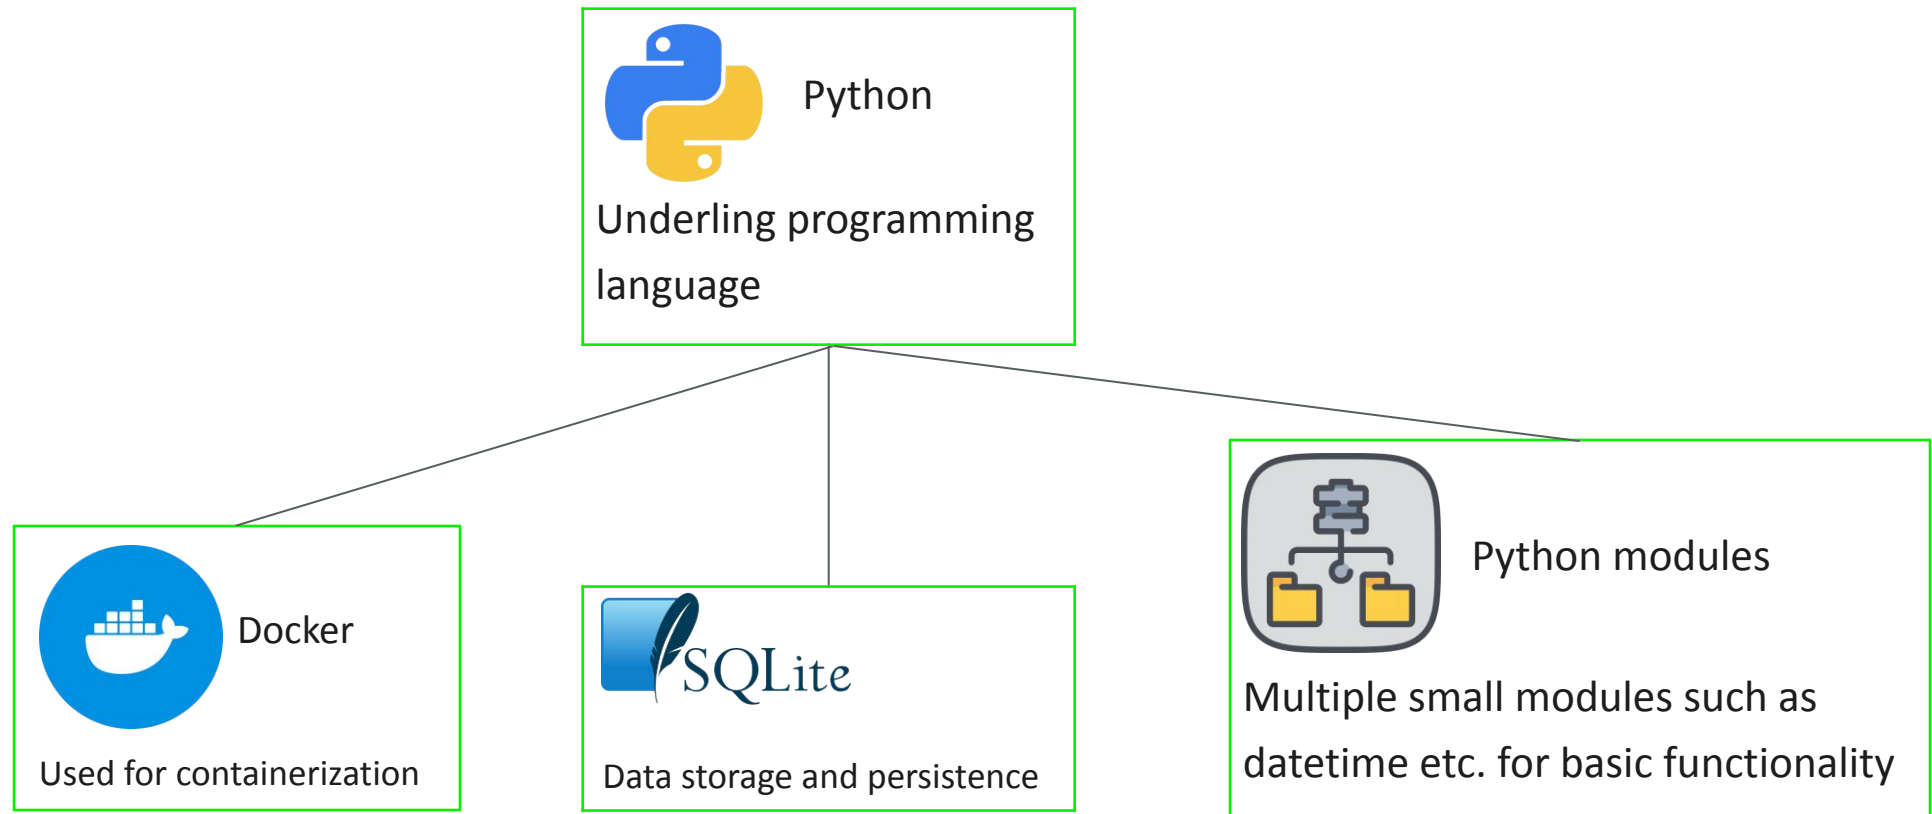

`analytics.py` – used for the analytics functions

`database.py` – enables database integration

Separation of concerns enables independent development and testing of each component.

Multiple tools and frameworks were used which allowed a quick and efficient design and implementation:

Start and help menu

```
uv run src\main.py

=====
🔥 HABIT TRACKER - Build Better Habits 🔥
=====
Type 'help' to see available commands

> help

=====
AVAILABLE COMMANDS
=====
create      - Create a new habit
list        - List all habits
complete    - Mark a habit as completed
delete      - Delete a habit
update      - Update habit details
analyze     - View habit analytics
summary     - Display overall statistics
help        - Show this help menu
exit        - Exit the application

> create

📅 Create New Habit
=====
Enter habit name: Read two pages of a book every night during bedtime

Periodicity options:
1. Daily
2. Weekly
Select periodicity (1 or 2): 1

✅ Habit 'Read two pages of a book every night during bedtime' (daily) created successfully!
```

```
uv run src\main.py

📅 Your Habits
=====
ID   Name                                     Period   Streak   Status
=====
1    Read two pages of a book every night during bedtime daily    0        ✓ Active
=====
Total habits: 1

Enter habit ID to update: 1

Updating habit: Read two pages of a book every night during bedtime
New name (press Enter to keep 'Read two pages of a book every night during bedtime'):

Periodicity options:
Current: daily
1. Daily
2. Weekly
Select new periodicity (or press Enter to keep current):

✅ Habit updated successfully!

> complete

📅 Your Habits
=====
ID   Name                                     Period   Streak   Status
=====
1    Read two pages of a book every night during bedtime daily    0        ✓ Active
=====
Total habits: 1

Enter habit ID to mark as complete: 1

✅ Habit 'Read two pages of a book every night during bedtime' marked as complete!
🔥 Current streak: 1 daily period(s)

>
```

List and delete habit(s)

```
Select periodicity (1 or 2): 1

✅ Habit 'Drink 1 gallon of water' (daily) created successfully!

> list

📅 Your Habits
=====
ID   Name                                     Period   Streak   Status
=====
2    Drink 1 gallon of water daily 0        ✓ Active
1    Read two pages of a book every night during bedtime daily    1        ✓ Active
=====
Total habits: 2

> delete 2
❌ Unknown command: 'delete 2'. Type 'help' for available commands.

> delete

📅 Your Habits
=====
ID   Name                                     Period   Streak   Status
=====
2    Drink 1 gallon of water daily 0        ✓ Active
1    Read two pages of a book every night during bedtime daily    1        ✓ Active
=====
Total habits: 2

Enter habit ID to delete: 1
⚠️ Are you sure you want to delete 'Read two pages of a book every night during bedtime'? (yes/no): yes
✅ Habit 'Read two pages of a book every night during bedtime' deleted successfully!

>
```

List, create, and mark habit(s)

✦ Every interaction (create, delete, edit) can be done with either the initial letter or the whole word.

Show analytics of habits

Shows the longest streak of all habits

Lists each habit by its corresponding
periodicity

View all habits with each current streak

Show the streak for a defined habit

View top 5 performing habits

Currently, there is only one habit

```
> analyze
```

```
📊 Habit Analytics
```

1. List all tracked habits
2. List habits by periodicity (daily/weekly)
3. Show longest streak across all habits
4. Show longest streak for specific habit
5. Show struggling habits (completion rate < 50%)
6. Show top performers
7. Back to main menu

```
Select option (1-7): 1
```

```
📋 All tracked habits (1):  
1. Drink 1 gallon of water
```

```
> analyzw
```

```
❌ Unknown command: 'analyzw'. Type 'help' for available commands.
```

```
> analyze
```

```
📊 Habit Analytics
```

1. List all tracked habits
2. List habits by periodicity (daily/weekly)
3. Show longest streak across all habits
4. Show longest streak for specific habit
5. Show struggling habits (completion rate < 50%)
6. Show top performers
7. Back to main menu

```
Select option (1-7): 6
```

```
🌟 Top 5 performers:  
1. Drink 1 gallon of water - 0 daily streak
```
